CLEARWATER TOWNSHIP ZONING ORDINANCE #22

ZONING ORDINANCE CLEARWATER TOWNSHIP

An ordinance to establish zoning districts and regulations in the Township of Clearwater, County of Kalkaska and State of Michigan, in accordance with the provisions of Act 110 of the Public Acts of 2006, and Act 33 of the Public Acts of 2008, as amended; and to define certain terms used herein; to establish a Zoning Board of Appeals and define its duties and powers; to provide for the administration and enforcement; to provide for amendments; and to provide penalties for the violation of this Ordinance.

ARTICLE I SHORT TITLE

1.01 This Ordinance shall be known as "Clearwater Township Zoning Ordinance" and will be referred to herein as "this Ordinance".

ARTICLE II INTERPRETATION

2.01 PURPOSE

The fundamental purposes of this Ordinance are:

- A. To promote the public health, safety, peace, and general welfare of the inhabitants of Clearwater Township; and
- B. To provide for the protection and preservation of the high quality of our lakes, rivers, streams, and wells, to the end that the waters thereof shall continue to afford a safe and adequate water supply and optimum recreational enjoyment; and
- C. To encourage the use of lands in accordance with their character and adaptability; thereby conserving natural resources and property value and limiting the improper use of land; and
- D. To avoid the overcrowding of population; to lessen congestion on public streets and highways; to reduce hazards to life and property due to fire, flooding, erosion, pollution, excessive dust, fumes, noise, vibration, noxious odors or other hazards; and
- E. To prevent the overburdening of existing or available public services and utilities, to facilitate improvements; and to conserve the expenditure of funds for public improvements and services to conform with the most advantageous use of land, resources and properties; and
- F. To provide for the orderly growth of the residential and economic attributes of the Township; and
- G. To provide only those restrictions of individual freedom and activity which are consistent with the fundamental purposes outlined in this Article.

2.02 SCOPE

It is not intended by this Ordinance to repeal, annul, or in any way impair or interfere with existing provisions of law or ordinance, except as hereinafter specifically repealed, or with any rules, regulations or permits previously adopted or issued or which shall be adopted or issued pursuant to law, relating to the use of buildings or premises, or with any private restrictions placed upon property by covenant or deed; provided, however, that where this Ordinance imposes a greater restriction upon the use of buildings or

premises than are imposed or required by such existing provisions of law or ordinance or by such rules, regulations or permits or by such private restrictions, the provisions of this Ordinance shall control.

The purpose and intent of the Sections of this Ordinance pertaining to the regulation of sexually oriented businesses is to regulate the location and operation of, but not to exclude, sexually oriented businesses within the township, and to minimize their negative secondary effects. It is recognized that sexually oriented businesses, because of their very nature, have serious objectionable operational characteristics which cause negative secondary effects upon nearby residential, educational, religious and other similar public and private uses. The regulation of sexually oriented businesses is necessary to ensure that their negative secondary effects will not contribute to the blighting or downgrading of surrounding areas and will not negatively impact the health, safety and general welfare of township residents. The provisions of this Ordinance are not intended to offend the guarantees of the First Amendment to the United States Constitution or to deny adults access to sexually oriented businesses and their products, or to deny sexually oriented businesses access to their intended market. Neither is it the intent of this Ordinance to legitimize activities which are prohibited by Township ordinance, state or federal law. If any portion of this Ordinance relating to the regulation of sexually oriented businesses or references in those sections is found to be invalid or unconstitutional by a court of competent jurisdiction, the Township intends said portion to be disregarded, reduced and/or revised so as to be recognized to the fullest extent possible by law. The Township further states that it would have passed and adopted what remains of any portion of this Ordinance relating to regulation of sexually oriented businesses following the removal, reduction or revision of any portion so found to be invalid or unconstitutional.

ARTICLE III ZONING DISTRICTS

3.01 CLASSIFICATION

For the purpose of this Ordinance, the Township of Clearwater is divided into the following land use districts:

- A. Residential
 - R-1: Single-family Residential ([ARTICLE XIII](#))
 - R-2: Multifamily Residential ([ARTICLE XIV](#))
 - R-3: Forest Residential ([ARTICLE XV](#))
 - R-Vil: Village Residential ([ARTICLE XVI](#))
- B. Agricultural ([ARTICLE XVII](#))
- C. Recreational ([ARTICLE XVIII](#))
- D. Commercial
 - C-Vil: Village Commercial ([ARTICLE XX](#))
 - C-LI: Commercial-Light-Industry ([ARTICLE XXI](#))

The districts into which each parcel of land in the Township is placed are shown on the map which accompanies and is hereby made a part of this Ordinance. All proper notations on the map shall be as much a part of this Ordinance as though specifically described herein.

3.02 INTERPRETATION OF DISTRICT BOUNDARIES

Unless otherwise stated, all land use district boundaries are intended to follow lot lines, or the center lines of roads, streets, alleys, or section or sub-section lines as they exist on the date of enactment of this Ordinance.

3.03 EXACT LOCATION

The Zoning Board of Appeals shall determine, when required, the exact location of land use boundaries that may otherwise be in question.

3.04 REPLACEMENT OF OFFICIAL ZONING MAP

In the event that the official Zoning District Map of Clearwater Township is damaged, destroyed, lost, or in need of replacement because of difficulties interpreting due to scale, poor drafting technique or the nature or number of changes made thereto, the Township Board may by Resolution, authorize the preparation of a new official Zoning Map which shall accurately depict the zoning districts of Clearwater Township. The replacement map may correct drafting or other errors or omissions on the existing official map, but no corrections shall have the effect of amending the Zoning Ordinance or the official Zoning Map. Any difficulty encountered in determining zoning boundaries or district classifications shall be resolved by the Zoning Board of Appeals. The Township Board may take this action on the recommendation of the Planning Commission. A replacement Zoning Map shall take effect upon certification by the signatures of the Chairman of the Planning Commission and by each member of the Zoning Board of Appeals that it is an accurate reproduction of the official Zoning Map it replaces. The new official Zoning Map shall be identified by the signature of the Township Supervisor. Unless the official Zoning Map has been lost, or

has been totally destroyed, the prior map or any significant parts thereof remaining, shall be preserved together with all available records pertaining to its adoption or amendment.

A copy of this Ordinance and any amendments thereto shall be kept on file, as a matter of public record, in the Office of the Township Clerk.

ARTICLE IV GENERAL PROVISIONS

4.01 CONFLICTING LAWS, REGULATIONS AND RESTRICTIONS

The provisions of this Ordinance shall be held to be the minimum requirements for promoting the public health, safety and general welfare. Whenever the requirements of this Ordinance conflict with other lawfully adopted rules, regulations or restrictions, or with existing easements, covenants, or other agreements between parties, the requirements imposing the higher standards shall govern. Compliance with the terms of this Ordinance in no way removes responsibility for obtaining any and all other permits and approvals required by local, state or federal law before commencing with any construction upon or use of land within the territory affected by this Ordinance.

4.02 UNLISTED PROPERTY USES

The Zoning Board of Appeals shall have the power upon written request of any property owner, the Zoning Administrator or the Planning Commission to classify a use not listed in the Ordinance. In determining the proper classification for an unlisted land use or structure, the Zoning Board of Appeals shall consider the characteristics of the use under consideration in relation to similar and comparable uses listed in this Ordinance. Once classified, the use is subject to all applicable regulations pertaining to similar uses in that district, including Special Use Permit considerations if classified as such by the Zoning Board of Appeals.

The purpose of this strip is to stabilize the river banks, prevent erosion, absorb nutrients in water runoff from adjacent lands, provide shading for the stream to maintain cool water temperatures and screening of adjacent man-made structures.
 - 2. The Zoning Administrator shall notify each applicant for a Land Use Permit of the purpose of this vegetative strip.

4.04 USES

Uses in all Districts are subject to requirements as listed in [ARTICLE IX](#) (Schedule of Regulations) and [ARTICLE XI](#) (Off-Street Parking and Loading).

No earth changing activities shall be undertaken except in compliance with the Natural Resources and Environmental Protection Act, Part 91 Soil Erosion and Sedimentation Control, (Public Act 451 of 1994, as amended), and only after obtaining a valid permit from the Kankaska County Soil Erosion officer.

An Ordinance to amend the Clearwater Township Zoning Ordinance to designate wireless telecommunication towers and antennas as permitted uses, uses subject to special use permit, and accessory structures; and to add and amend certain definitions.

A. PURPOSE

The purpose of this ordinance is to establish general guidelines for siting wireless telecommunication towers and antennas. The Township recognizes that it is in the public interest to permit the siting of wireless telecommunication towers and antennas within the Township. The Township also recognizes the need to protect the scenic beauty of Clearwater Township from unnecessary and unreasonable visual interference, and that wireless telecommunication towers and antennas may have negative aesthetic impacts upon adjoining and neighboring uses. As such, this ordinance seeks to:

1. Protect residential areas from potential adverse impact of towers and antennas;
2. Encourage the location of towers in nonresidential areas;
3. Minimize the total number of towers throughout the community;
4. Encourage the joint use of new and existing tower sites rather than the construction of additional towers;

6. Enhance the ability of providers of telecommunication services to provide such services to the community quickly, effectively, and efficiently;
7. Consider the public health and safety of telecommunication towers; and
8. Avoid potential damage to adjacent property and injury to citizens from tower failure.

B PERMITTED USES

The following uses are specifically permitted in any Agricultural or Recreational District:

1. Telecommunication towers located on property owned, leased, or otherwise controlled by Clearwater Township provided a license or lease authorizing such telecommunication tower antenna has been approved by Clearwater Township.
2. Antenna co-located on telecommunications towers which have received a special use permit which included review of the standards set forth in [ARTICLE XXIV](#) of this ordinance.

All private access easements shall have names approved by the Clearwater Township Board and shall be consistent with and accepted by the Kankaska County Road Commission naming and requirements and Kankaska addressing system.

B. Easement and Maintenance Agreement

 - a. A statement indicating that the access easement is private and not subject to the maintenance jurisdiction of Kalkaska County or Clearwater Township. Further, that such access easement shall not be maintained or improved at the expense of Clearwater Township unless the maintenance or improvement is funded by a special assessment of the owners of property accessed by the easement.
 - b. Provisions to assure that the easement is maintained to allow passage by emergency and vice vehicles during all weather conditions that are reasonably expected in Clearwater Township.
 - c. A mechanism for equitably allocating the cost of construction and maintenance among current and future owners of property accessed by the easement.
 - d. A statement notifying all owners of property accessed by the easement that any prohibition, restriction, limitation or any other manner of interference with normal ingress and egress or use by other owners, their guests, tradesmen, vendors, delivery persons and emergency service personnel is prohibited.

In the event that a 33 foot easement is established, the deed shall be recorded with the following notation: Access easements of less than 66 feet may not be accepted for dedication to public use by the Kalkaska County Road Commission and shall not be the responsibility of Clearwater Township.
2. Shall be posted with the Road name and its designation as a private access easement.

R-3	2 acres	165	16	30	10	10

C-LI (4)	1 acre	150	14	40	10 side/30 rear	10
Mobile Home Parks (7)	5,500	---	13	50	---	---

- (1) Width is measured at the front setback line. In the event of a parcel of irregular shape, width may be measured at the front point of the structure nearest the front property line, provided that at that point the lot does meet the minimum standard for that district.
- (2) Corner lots must meet the required setback at both front and side R-O-W. Setbacks are measured from the road R-O-W or easement boundary or side/back lot line to the nearest part of a structure. Decks, sheds, and other appurtenant structures must meet setbacks.
- (3) No front parking is allowed at this setback distance. In the event of front parking, the structural setback must be 40 feet to allow vehicle turn-around for street re-entry.
- (4) It is the intent of Amendment 49 that any new Commercial or Light-Industry Districts created after January 27, 2001, shall follow the standards of this Commercial-Light-Industry District.
- (5) Access easements, utility easements, and road rights-of-way which overlay unplatted land parcels shall be included in the calculation of the minimum required land area. For example, given a 10 acre parcel, a portion of which contains a 66 foot access easement to reach an adjacent parcel, that 10 acre parcel may be divided into 2 qualifying 5 acre parcels, one or both of which may contain area belonging to the easement. This interpretation shall apply to unplatted parcels of any size. In the case of platted parcels, the area shall be calculated according to the individual lot dimensions recorded on the plat.
- (6) Amendment 10, December 6, 1989, which exempted unroofed decks from setback requirements, is

deleted by this present Amendment.

(7) Mobile Home Parks must conform to State Mobile Home Park Regulations with respect to conformance with the HUD code, presentation of a Title reliably confirming date of manufacture, and roads and grounds and sanitation layout and approval. They also must conform to the standards of Article 13 of this Ordinance, which specifies a minimum living area of 800 sq. ft. and a minimum width of 13 feet, measured at exterior surfaces.

(8) Multiple-family units for general public use are allowable by Special Use Permit in Village Residential, Village Commercial, and Residential-2. Lot dimensions are regulated to allow for adequate off-street parking, snow removal, and common use grounds, according to Section 29.04. The minimum lot width shall be 200 ft. for structures containing 3-20 dwelling units, and subject to Planning Commission determination, upon Site Plan Review, for greater than 20 units. The minimum lot area for one- and two-family dwellings is 15,000 sq. ft. For single story, multifamily dwellings, the minimum lot area is 15,000 sq. ft. for the first 2 dwelling units, plus a minimum of 2,000 sq. ft. per dwelling unit for dwelling units 3 through 9. For 10 or more dwelling units, the lot area shall be increased by 1,600 sq. ft. per additional dwelling unit beyond 9. For upper story dwelling units, the lot area increase per dwelling unit shall be 600 sq. ft. less than the standards defined in the previous sentence, since the “footprint area” requirement of 600 sq. ft. shall have already been established by the ground floor units.

Subject to Planning Commission examination upon site plan review

14.01 PURPOSE

The purpose of providing this Residential District is to establish areas in Clearwater Township primarily dedicated to residential uses, including multifamily and multi-resident dwellings, in which each dwelling or accessory structure hereafter erected is located on an individual lot or premises adequate in size and shape to provide safe water and sewage disposal facilities, to minimize spread of fire, and which is set back from the public thoroughfare to facilitate safe exit from and entrance to the premises.

14.02 PERMITTED USES

No building or structure or any part thereof shall be erected, altered or used, or land or premises used, in whole or in part for other than one of the following specified uses:

A. One single-family or one two-family detached dwelling on a minimum net lot size of fifteen thousand (15,000) square feet, said lot having a minimum width of one hundred (100) feet measured at the front setback line, and said dwelling meeting the following requirements:

1. The dwelling shall contain a minimum of (800) eight hundred square feet enclosed living area and shall comply with the County Building Code, including minimum heights for habitable rooms. Where a dwelling is required by law to comply with a federal or state standard or regulation for construction and where such regulation or standard is different from that imposed by the County Building Code, then, and in that event such federal or state standard or regulation shall apply.
2. The dwelling shall have a minimum width of at least (14) fourteen feet measured between the exterior surfaces of exterior walls.
3. The dwelling shall be firmly attached to a permanent foundation constructed on the site in accordance with the County Building Code, and shall have a wall of the same perimeter dimensions of the dwelling and constructed of such material and type as required in the applicable building code for single-family dwellings. In the event that the dwelling is a mobile home, as defined herein, such dwelling shall be installed pursuant to the manufacturer's set-up instructions and shall be secured to the premises by an anchoring system or device, and shall be set on a footing as required in the applicable building code with a masonry wall extending from perimeter to ground, or on a footing as required in the applicable building code, with fireproof supports, and shall have a continuous skirt extending from perimeter to the ground. Such skirt shall be of commercial quality or equivalent, and shall comply with the rules and regulations of the Michigan Mobile Home Commission, the Public Health Department, and HUD Regulations 24 CFR 3280, being the "Mobile Home Construction and Safety Standards."
4. In the event that a dwelling is a mobile home as defined herein, it shall be installed with the wheels removed. Additionally, no dwelling shall have any exposed towing mechanism, undercarriage, or chassis.
5. The dwelling shall be connected to a public sewer and water supply or to such private facilities approved by the local health department in connection with the application for a Land Use Permit for installation of the dwelling.

It shall have not less than two exterior doors, with the second door being either in the rear or on a side of the dwelling. It shall contain steps or porches connected to said door areas where a difference in elevation requires the same.

7. The compatibility of design and appearance shall be determined in the first instance by the Zoning Administrator upon review of the plans submitted for a particular dwelling, subject to appeal by an aggrieved party to the Zoning Board of Appeals within a period of thirty (30) days from the receipt of notice of said Zoning Administrator's decision. Any determination of compatibility shall be based on the standards set forth in this definition of "dwelling," as well as the character, design, and appearance of one or more residential dwellings located outside of Mobile Home Parks within two thousand (2000) feet of the subject dwelling, where such area is developed on not less than 20% of the lots situated therein; or, where said area is not so developed, by the character, design, and appearance of one or more residential dwellings located outside of Mobile Home Parks throughout the township. The foregoing shall not be construed to prohibit innovative design concepts involving such matters as solar energy, unique land contour, or relief from the common or standard designed home.
8. The dwelling shall contain no addition or rooms or other areas which are not constructed with similar quality workmanship of the original structure.
9. The dwelling shall comply with all pertinent building and fire codes. In the case of a mobile home, all construction and all plumbing and electrical apparatus and insulation within and connected to said mobile home shall be of a type and quality conforming to all state and federal requirements.

2. Structures and additions to structures shall be externally no different than structures permitted throughout the Residential District,
3. Activities associated with Home Occupation shall not constitute a hazard or nuisance to adjoining residents or others by reason of noise, smoke, odor, electrical disturbance, night lighting, or the creation of unreasonable traffic to the premises, and
4. Outward displays of any kind indicating the commercial, professional or non-residential aspects of the premises are not permitted except one sign or nameplate is permitted in accordance with [ARTICLE XII](#).

D. Accessory buildings such as a detached garage or boathouse for the storage of automobiles and boats, provided, however, that the same comply with setback restrictions and side yard requirements of the dwelling.

E. Docks and boat houses on lakes, ponds, streams or rivers provided they are built subject to all specifications of a permit issued by the Michigan Department of Natural Resources pursuant to the Natural Resources and Environmental Protection Act, P.A. 451 of 1994, Part 301 Inland Waters, as amended.

F. The keeping of domestic pets, livestock, and poultry for personal, noncommercial use, provided that the same are maintained and housed so as not to be a public nuisance.

G. Truck gardening and crop farming within the standards established by the applicable GAAMPs, as provided for in Michigan's Right to Farm Act.

H. Travel trailers, motor homes, camping or recreational vehicles may be stored in a Residential District, as long as they are stored in a manner that meets the district setbacks. Storage is not permitted on a commercial or rental basis, and vehicles shall have tires mounted and not be skirted

I. Mobile homes shall be in place no longer than forty-five (45) days without being affixed to a permanent foundation with wheels and tongue removed and skirting attached so that the undercarriage is enclosed. A. GENERAL STANDARDS

The Planning Commission shall review the particular circumstances of the Special Use request under consideration in terms of the following standards, and shall recommend a Special Use only upon a finding of compliance with each of the following standards, as well as applicable standards established elsewhere in this Ordinance:

In fixing the amount of such financial guarantee, the Township Board shall take into account the size and scope of the proposed use, current prevailing cost of rehabilitating the premises upon default of the operator to comply by Court Decree, and such other factors and conditions as might be relevant in determining the sum reasonable in the light of all facts and circumstances surrounding each application.

However, in no event shall the density exceed an amount more than twice that of the zoning district in which the PUD is located.

G. PERFORMANCE GUARANTEE

Each application shall be accompanied by such fee as deemed necessary the Township Board to meet undue expenses provided that, in the opinion of the Township Board, such fee does not pose a hardship.

I. TIME LIMIT

Every application for PUD, together with all recommendations made under Section [24.09](#) when approved by the Township Board, either as submitted or resubmitted in modified form, shall constitute a binding agreement by the applicant that the use permitted under this Article shall be made, completed and operated as shown on the development plan as part of the project in accordance with the provisions of this Article and that the area which has been approved PUD shall lose that status and revert to and be resumed to its former use classification upon the happening of any of the following events:

1. If the construction of the approved buildings and improvements shall not be undertaken within one (1) year of the approval or within such additional time extension as may be authorized by the Township Board.
2. If, as a result of voluntary sale or conveyance, or any other transfer of ownership whatsoever, the area shall cease to be held, in its entirety, in single or common ownership.

24.09 ADDITIONAL STANDARDS APPLICABLE TO PARTICULAR USES

In addition to the standards set forth in a particular zone and the standards set forth in Section [24.03](#) of the Ordinance, the uses below must meet the following additional standards:

A. TELECOMMUNICATION TOWER

1. Application. The applicant must indicate that no existing tower, alternative tower structure or alternative technology not requiring the use of towers or alternative tower structures can accommodate the applicant's proposed antenna. An applicant shall submit information requested by the Planning Commission related to the availability of suitable existing towers, other alternative towers or alternative technology. Evidence submitted to demonstrate that no existing tower, alternate tower structure or alternative technology can accommodate the applicant's proposed antenna may consist of any of the following:
 - a. No existing towers or alternative tower structures are located within the geographic area which meet applicant's engineering requirements.
 - b. Existing towers or alternative tower structures are not of sufficient height to meet applicant's engineering requirements.
 - c. Existing towers or alternative tower structures do not have sufficient structural strength to support applicant's proposed antenna and related equipment.
 - d. The applicant's proposed antenna would cause electromagnetic interference with the antenna on the existing towers or alternative tower structures, or the antenna on the existing towers or alternative tower structures would cause interference with the applicant's proposed antenna.
 - e. The applicant presents evidence that fair market value offers have been made to co-locate their antennae on any existing tower in the Township that would meet applicant's geographical and engineering requirements, and that such offers have been refused by the owners/operators of such existing towers, after such owners have been advised by the applicant that co-location is the policy of the Township and that the Township, in support of that policy, expects that no offer shall be unreasonably refused by the owner/operator of an existing suitable tower.
 - f. The applicant demonstrates that there are other limiting factors that render existing towers and structures unsuitable.
2. Setbacks. The following setback requirements shall apply to all towers for which a special use permit is required; provided, however, that the Planning Commission may reduce the standard setback requirements if the goals of this ordinance would be better served thereby.
 - a. Towers must be set back a distance equal to at least one hundred percent (100%) of the height of the tower from any adjoining lot line.
 - b. Guys and accessory buildings must satisfy the minimum zoning district setback requirements.
3. Security Fencing. Towers and attendant accessory structures shall be enclosed by security fencing not less than six feet (6') in height and shall also be equipped with an appropriate anti-climbing device; provided, however, that the Planning Commission may waive such requirements, as it deems appropriate.
4. Landscaping. The following requirements shall govern the landscaping surrounding towers for which a special use permit is required; provided, however, that the Planning Commission may waive such requirements if the goals of this ordinance would be better served thereby.
 - a. Tower facilities shall be landscaped with a buffer of plant materials that effectively screens the view of the tower compound from property used for residences. The standard buffer

- shall consist of a landscaped strip at least four feet (4') wide outside the perimeter of the compound.
- b. In locations where the visual impact of the tower would be minimal, the landscaping requirement may be reduced or waived.
 - c. Existing mature tree growth and natural land forms on the site shall be preserved to the maximum extent possible. In some cases, such as towers sited on large, wooded lots, natural growth around the property perimeter may be sufficient buffer.
5. State or Federal Requirements. All towers must meet or exceed current standards and regulations of the FAA, the FCC, and any other agency of the state or federal government with the authority to regulate towers and antennas. If such standards and regulations are changed, then the owners of the towers and antennas governed by this Ordinance shall bring such towers and antennas into compliance with such revised standards and regulations within six (6) months of the effective date of such standards and regulations, unless a different compliance schedule is mandated by the controlling state or federal agency. Failure to bring towers and antennas into compliance with such revised standards and regulations shall constitute grounds for the removal of the tower or antenna at the owner's expense.
 6. Aesthetics. Towers and antennas shall meet the following requirements:
 - a. At a tower site, the design of the buildings and related structures shall, to the extent possible, use materials, colors, textures, screening, and landscaping that will blend them into the natural setting and surrounding buildings.
 - b. Where a feasible alternative exists, towers, alternative towers structures and supporting structures shall not utilize a power source which generates noise able to be heard by a person of normal aural acuity at adjoining property lines or public property; however, this section shall not be construed as limiting the use of temporary generators or similar devices used to create power during periods of interruption of the primary power source.
 7. Lighting. Towers shall not be artificially lighted, unless required by the FAA or other applicable authority. If lighting is required, the lighting alternatives and design chosen must cause the least disturbance to the surrounding views.
 8. Compliance with Codes. Antenna and metal towers shall be grounded for protection against a direct strike by lightning and shall comply as to electrical connections and wiring and as to structural integrity with all applicable state and local building codes and the applicable standards for towers published by the Electronic Industries Association, as amended from time to time.
 9. Interference with Residential Reception. Towers shall be located so that they do not interfere with television and radio reception to neighboring residential areas.
 10. Signs. Towers shall bear no signage, other than such small signs as may properly convey information identifying the owners and their emergency maintenance phone numbers, and such warning signs as may be useful to protect the public from contact.
 11. Spacing-Residences. A tower shall not be located within two hundred feet (200') or three hundred percent (300%) of the height of the tower, whichever is greater, of a park or public right of way, or of a single-family or multiple family dwelling unit, church, school, or other structure normally used and actually used for the congregation of persons. Distance for the purpose of this section shall be measured from the base of the tower structure to the lot line of the park, right of way, single-family or multiple family dwelling unit, church, school, or other structure normally used and actually used for the congregation of persons.
 12. Removal of Abandoned Antennas and Towers. Any antenna or tower that is not operated for a continuous period of twelve (12) months shall be considered abandoned, and the owner of such

antenna or tower shall remove the same within ninety (90) days of receipt of notice from the Township notifying the owner of such abandonment. Along with said removal, said owner shall restore the site of said antenna or tower to its original condition prior to location of the antenna or tower subject to reasonable wear and tear. Failure to remove an abandoned antenna or tower within said ninety (90) days shall be grounds to remove the tower or antenna at the owner's expense. If there are two or more users of a single tower, then this provision shall not become effective until all users cease using the tower. The Planning Commission may require the applicant to file a bond equal to the reasonable cost of removing the tower, antenna, alternative tower structure or other supporting structure(s) as a condition of a special use permit given pursuant to this section.

13. Collapsibility. Towers shall be designed to internally collapse in the face of natural forces.
14. Emergency Access. There shall be access to the tower sufficient to allow service by emergency vehicles.
15. Emergency Contact. Special Use Permit applications shall contain addresses and phone numbers sufficient to reach owners and maintenance personnel in the event of emergency, and such phone numbers shall be displayed on signs at the tower site.

26.11 STANDARDS FOR REVIEWING DIMENSIONAL (NON-USE) VARIANCES

The standards for reviewing applications for dimensional variances are intended to ensure that the variances are granted in only those circumstances where truly unusual conditions are present on a parcel. As a result, a dimensional variance may be granted by the Zoning Board of Appeals only in cases where the applicant demonstrates in the official record of the public hearing that practical difficulty exists by showing all of the following:

A. The property is subject to exceptional or extraordinary circumstances or conditions that do not apply generally to other properties in the same zoning district; e.g., unique dimensional, topographical, and/or structural conditions.

B. The requested variance is necessary for the preservation and enjoyment of a substantial property right such as is possessed by residents of other properties in the same zoning district. (The possibility of increased financial return is of itself not sufficient to warrant a variance.)

C. The requested variance will not be detrimental to adjacent property and the surrounding neighborhood.

D. The practical difficulty resulting in the need for the requested variance was not created by any action of the current property owner.

E. The requested variance is the minimum variance necessary to reasonably mitigate the practical difficulty.

26.12 APPLICATION

All appeals and requests for variances over which this Board has jurisdiction shall be filed in writing at the

Township Office, no less than twenty (20) days prior to meeting, accompanied by such fee as deemed necessary by the Township Board to meet undue expenses, provided that, in the opinion of the Township Board, such fee does not pose a hardship.

- B. The Zoning Board of Appeals shall return its decision in writing within thirty (30) days after a request or appeal has been heard unless additional time is agreed upon by all parties concerned.

26.14 RESUBMISSION

No application for variances or special exception which have been denied shall be resubmitted within ninety (90) days from the last date of denial, except on grounds of newly discovered evidence or proof of changed conditions.

26.15 APPEALS REGARDING SEXUALLY ORIENTED BUSINESSES

All appeals to the Zoning Board of Appeals which relate to sexually oriented businesses will be processed pursuant to this Article to the extent the provisions of this Article do not conflict with [ARTICLE XXIV](#), Section [24.02.J](#). If any provision of this Article does conflict with [ARTICLE XXIV](#), Section [24.02.J](#), the latter shall control.

26.16 CONDITIONS

The Board of Appeals may impose conditions on a variance that may make the difference in meeting one of the standards. For example, fencing or landscaping may reduce the potential negative impact of permitting a building closer to an adjacent property line.

**ARTICLE XXVII
PLANNING COMMISSION**

27.01 PLANNING COMMISSION

- E. On a rezoning petition, how would it affect the environmental conditions or value of the surrounding property if approved?
- F. Are there any significant negative environmental impacts which would reasonably occur if the petitioned zoning change were approved and the resulting allowed structures were built? Such as:

- A. The Planning Commission shall transmit copies of the proposed Zoning Ordinance, a summary of comments received at the Public Hearing, and its recommendation with respect to the Zoning Ordinance to the Township Board. 29.06 CHANGING THE TEXT

If the Township Board wishes to change the Zoning Ordinance text or map recommended by the Planning Commission, it will take one of two actions:

- 1) return the Ordinance to the Planning Commission with the desired changes specified, and request a

further report from the Planning Commission within a specified time; or
